## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-61 are allowed.
2. The following is an examiner's statement of reasons for allowance: In the response filed 08 September 2003, Applicant argues that the applied prior art (Tuck '139) discloses a field electron emission material with an MIMIV (metal-insulator-metal-insulator-vacuum) structure, but not an MIMI structure, since there is no teaching in Tuck that the process could be stopped at an intermediate point. Applicant's argument is persuasive (MPEP § 2144.09).
3. Thus, regarding independent claim 1, the prior art of record neither shows or suggests a method of forming a field emission material comprising, in addition to other limitations of the claim, a step of disposing on a substrate a plurality of electrically conductive particles, each with a layer of electrically insulating material disposed either in a first location between the conductive surface and the particle, or in a second location between the particle and the environment in which the field electron emission material is disposed, but not in both locations.
4. The subject field electron emission material having the structure discussed above is provided for producing emitting materials with low cost and high manufacturability. Due to their dependency upon independent claim 1, claims 2-61 are also allowable. The design is new and unique to the art.
5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
